Generation Plus ~ Family of Liquid Supplement
www.nationalfeedcommodities.com

Who We Are:

National Feed Commodities was born in 2003. The company was formed by men who have over 100 years of combined experience in agriculture. Men who have "hands on" experience in sales, production, transportation & formulation.

As they say "we have been there, and done that." Our desire is to provide quality feed ingredients and supplements to the North American manufacturer, dealer and producer.

We are headquartered in Atchison, KS, about an hour north of Kansas City, MO. Our terminals are located in Atchison, KS and Brunswick, MO. and have the capacity to store approximately 20,000+ tons of product. The proximity of our terminals to the source of ingredients gives us the edge in providing quality products at a competitive price.

We have our own fleet of tanker trucks and maintain an ample number of rail tank cars for immediate distribution.

Over the past few years we have grown cautiously, so that we learn our customers and your needs. Our goal is to meet the challenges of the constant changes in our market today. Whether it be the inevitable price hike, fuel surcharge or limited availability of ingredients, we are here to help minimize your stress. Our mission is to go beyond just making a good product, our mission is to reinstate Customer Service.

Please continue reading and find out why we are excited about;

Generation Plus

Family of Liquid Supplements

www.nationalfeed.com

What is Generation Plus?

This name was chosen for our diverse line of Liquid Supplements. The **Generation Plus** supplements can be designed to be fed to virtually any animal; cattle, horses, sheep, goats, or swine. That's what make us so unique, is our ability to formulate the various liquid ingredients to fit a specific application or animal.

Protein

Our protein sources allow us to make an "All-Natural", "no urea added", or a "high NPN supplement". Whatever the formulation we will use the best combination of ingredients to improve and enhance the animal performance and productivity. These combinations will allow maximum returns in any particular operation.

Hi-Energy

We incorporate in **Generation Plus**, a vital ingredient for a healthier animal, **vegetable oil**. The energy level in this vegetable oil exceeds energy levels derived from carbohydrates found in sugar. It is also more economical to add, thus making **Generation Plus** supplements a better performance supplement at a lesser cost.

Production

Generation Plus is made in truck load batches so you can be assured your load of Generation Plus was correctly mixed. This assures the quality and consistency of **Generation Plus**. Also, all of our batches are individually recorded and sampled.

In addition, we have a long list of various additives that can be added to give you a feed specifically designed for your operation.

- ◆ Vitamins ADE
- ◆ Extra Phosphorus
- ◆ Medications
- ◆ Mineral packages, designed specifically for your animal.
- ◆ Magnesium
- ◆ Natural Flavoring
